

Hello all and I hope every one is having a great summer so far since we have not had one yet. I want to thank Robert Wesson for the great job he did with the Spring Fish out. I also want to thank every one else that helped and attended. The weather was great until Louise showed up but all in all it was a great weekend. If you have never attended an event you are really missing out on something special.

The Casting Clinic started out with great weather and thank you Monty for a great job also. It did not take long for the weather to change again it seemed just after we had a great barbecue the rain gods started again and put a damper on what was a very nice evening. Thank you all that attended I hope you had a great time.

The Summer Fish out will not be held this year due to lack of interest and every one else trying to find a week or weekend with good weather.

MY self retirement has been good but has been busy and just like you I am trying to get out and do some fishing it seems that the streams should be fishable in a week or two. I and Doug and Murray will be addressing the barbecue issue and will be modifying it and the club has bought a new Camp Chef 3 burner stove that should help out with pancakes and such.

So I wish every one a great summer when it happens and look forward to fishing with you some day soon.

Daniel Young
