

Presidents Report

Hello all and all is great. The weather has taken a turn for the better and fishing is just around the corner. My first inaugural year has come to past and it was very rewarding and full filling. There is still much I would like to accomplish as your President and with the help of our newly elected executive members and you I hope we can move forward as a club and grow not only internally but externally also.

I am in the process of building 2 trophy cases one for us to display a few and one for the Bow Waters Canoe Club. One of my goals was to bring back a few trophies at a time and with that some pride and sportsmanship back into the club and also some euthamism. I also want to refurbish some of our old trophies that have been neglected.

I am also looking for more participation in club events and activities and for the most part it has been pretty good but we can do better. I am also trying to get going "Adopting a New Member" program and I am working on the final details. Again I will be doing Member Profiles and so if I ask you please volunteer it is all in good fun.

We have had a few new members volunteer to help were they can and that is great, I will be taking you up on your offer. I would like to start a rod building course starting in September so if any one is interested please let me know. I have had a brief chat with Geoff Pieroway regarding supplying the materials and he has offered to discount them and help out also. Look at this way we can always use another fly rod right!

If any one has any ideas or suggestions please forward them to me and the executive so do not be shy. One other thing I am hoping to get a summer calendar on the web site for the months of July and August. The thought behind this is that if you or a group of members are going fishing some where and do no mind having company or camping somewhere it will enable the rest of us to join you. We are going to try it and see how it works.

Well that as Bugs puts it "that's all folks" see you Wednesday and yes I will be tying some flies.

Daniel
